

# YOUR MANUFACTURING AND ASSEMBLY PARTNER FOR CUSTOMER-SPECIFIC SWIVELS

**Your specialist for the manufacture,  
assembly, and qualification  
of swivel systems**

Since 1923, Brück has stood for quality, precision, and innovation. We not only manufacture rolled rings but also produce complex forged parts for industrial applications. In Germany, we are your leading manufacturing and assembly partner for high-precision components in the oil and gas industry – exactly according to your specifications. We test according to the highest qualification standards and, if required, support you all the way through to successful installation.

## Your advantages:

▶ All processes under one roof

▶ 100% traceability

▶ Central & personal contact

EXPERIENCE  
**MADE IN GERMANY**  
WITH BRÜCK

# SECOND-LIFE SOLUTION FOR YOUR SWIVEL

## EFFICIENT, SAFE & SUSTAINABLE

Is your swivel showing signs of wear or in need of a complete overhaul? With our second-life solution, we can restore your existing system to peak performance – precisely, reliably, and in full compliance with the highest quality standards and at low cost. Extend the service life of your swivels and ensure the reliable operation of your offshore systems.

### Our performance promise:

► **Processing according to customer-specific drawings**

We work precisely according to your existing design documentation and ensure that all technical requirements are fully met.

► **Complete overhaul**

Your swivel is disassembled, cleaned, repaired, and, if necessary, rebuilt with high-quality components—for maximum service life and performance.

► **Testing according to qualification guidelines**

All functional and pressure tests are carried out in-house according to the strictest offshore and safety standards. We work with all well-known qualification companies and guarantee the full operational safety of your system.

► **Ready for the next use**

After successful qualification, we return your swivel to you ready for use – reliable, documented, and on time.
